HOME HEALTH FUNDAMENTALS SUBSCRIBER EMAILS — April 2023

1

The Least You Need to Know:

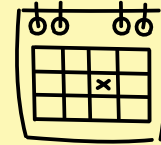

CMS has updated the Care Compare website with updated data and quality scores! Each quarter CMS updates the “Care Compare” website, where consumers and providers can go to see their quality scores, and be compared next to other competitors!

What’s New in the Quarterly Update?

The April 2023 quarterly refresh for the Home Health Quality Reporting Program is now available on [Care Compare](#).

For this refresh, Home Health (HH) Outcome and Assessment Information Set (OASIS) will be based on the standard number of quarters.

For additional information on the COVID-19 public health emergency’s impact on public reporting, please see the HH QRP COVID-19 Public Reporting Tip Sheet in the downloads section of the [HH Quality Reporting Training webpage](#).

Actions of a Prudent Home Health Agency™

ONE. Review your Care Compare scores - with your agency sales, leadership, QA and clinicians.

TWO. Monitor iQIES also for your “5 star Preview” report. This allows you to see more detail in regards to where your scores lie in the deciles.

THREE. Note the gaps. Make a plan using your QAPI team and process to show improvement.
